

Release Notes
PAWS Developer's Studio
Version 01.34.01
20 April 2006

1.1 Critical Items

1.2 Known Limitations

1.3 Enhancements

1.3.1 Allocinp file Management

At allocation time, if an allocation input is part of the Paws project and the physical file that it points to is missing, an allocation warning is issued. In this circumstance, Paws Studio performs the allocation process without allocation input. To avoid this warning, the user should either provide a valid allocation input file or delete the allocation input item from his Paws project tree.
