

Release Notes
9504 PAWS Studio Flowcharter
Version 2.2.0
Release date: 22 FEB 2000

Overview

Flowcharter version 2.2.0 addresses the IEEE-416 Tornado subsets compliance. The previous version did not cover IEEE-416 Tornado subsets, but worked well in most cases. Some IEEE-416 Tornado test cases made flowcharter hang. The cause was identified to be the FOR UUT, ... statements. It was also discovered that the previous versions did not flow correctly for conditional GO TO statements. These issues were addressed and corrected.

Extensive testing was also performed. There were no problems identified during tests.

1.1 Critical Items

None

1.2 Known Limitations

No limitations identified so far for Flowcharter 2.2.0.

1.3 Enhancements

1.3.1 Support for IEEE-416 Tornado subsets.

1.3.2 Flow generation for conditional GO TO statements corrected.

1.4 Problem Reports

None
